

Living Water Ionizer

New Living Water utilizes revolutionary Direct Disk Ionization Technology to produce pH-optimized water for a healthy body, a healthy home and a healthy life.

Not All Water Is Created Equal.

Drinking enough water isn't really enough. You have to drink the right kind of water - water that will help buffer acid, help remove toxins, and is easily absorbed by your body. You need great tasting water with antioxidant properties and proper pH levels.

Having a Living Water is like owning a limitless supply of alkaline, ionized, healthy water. You get pH-balancing, healthy alkaline water for drinking and cooking, strong alkaline water for washing vegetables, and acidic water for cleaning. Plus, when you drink alkaline water regularly, you're helping your body to hydrate itself as well as flush out toxins and waste products. If you're trying to lose weight, you may get a boost there as well. Overall, there's no better way to help stay healthy.

Benefits:

- Provides acid-buffering alkaline water for drinking and cooking, right at your faucet
- Produces acidic water for cleaning without chemicals
- Generates water with excellent negative Oxidation Reduction Potential (ORP) for increased antioxidant properties
- Easily installs to your existing faucet with no special plumbing

Features:

- A patented constant power output design monitors the TDS level of the source water and automatically adjusts accordingly to maintain a constant pH level.
- The Living Water is designed to operate in low or high TDS areas, even when the TDS is in the thousands.
- Accidental use of hot water will not harm the unit as there are no membranes. A unique water-cooled power supply allows for continual operation without risk of overheating.
- Living Water offers 8 different pH levels, ranging from 4.0 acidic water to 10.0 alkaline water plus a SUPER function to achieve extreme pH levels when needed.
- The Living Water features a reusable mineral port for use with common sea salt for enhanced mineralization for higher levels of pH.
- An easy to read, multicolor LCD control panel keeps track of performance particulars, including total liters produced, life indicators, and pH setting. Each pH setting changes the background color of the LCD
- The Living Water® is water resistant so that splashes and spills will not harm the electronics.
- Easy to install with only 2 connections, water in and drain out, and Living Water can be installed to the left or right of the sink, without any adjustments.
- A unique Switching Mode Power Supply makes the Living Water always ready for international use. The unit can be plugged into 100v, 110v, 220v or 240v without any adjustment.
- Water passes through two filters before ionization occurs:
 - The first filter is a carbon and sediment filter which removes unpleasant tastes and odors from the water.
 - The second filter is a carbon and food grade calcium sulfite filter to ensure proper mineralization of the water using good calcium.
 - Filters can be easily removed and replaced with a simple twist and lock design.
- Living Water was designed for easy maintenance. The unit has an automatic cleaning cycle every 12 minutes of use. Annual cleaning can be performed at home with the port adapter and cleaning kit.
- With proper care and maintenance, the Living Water provides a longer service life than conventional plate units and features a 5-year limited warranty.

Specifications:

Electrode Type: Titanium steel w/platinum

Water Filtration: Two filter system

Filter Life: 10,000 liters

pH Range: 2.0 ~ 11.0+ depending on water source conditions

ORP Range: +500mv to -400mv

Size: 10.8 in. wide x 12.4 in. high x 5.5 in. deep

Weight: (lbs.) 8.1

Water Temp: 39° F (4° C) to 95° F (35° C)
